

NACE training course “COATINGS”

co-organized by Croatian Society for Materials Protection

- First announcement -

Date: 09.10.2019.

Venue: Valamar Collection Isabella Island resort, Poreč

Lecturer: **D. Terry Greenfield**, current president of NACE International (2019-2020)

D. Terry Greenfield

The six-hour training course will explore protective coatings basics in the morning session. The curriculum will include coating selection based on service environments, the range of coating materials available today, and associated installation methods. The afternoon session will focus on the installation of various coatings systems. The surface preparation and coatings application methodology will be explored along with the pros and cons of the various methods. Inspection requirements, testing instrument use, and methods will also be examined.

This course would be valuable to all that use or are involved with protective coatings as a method of corrosion control...engineers, end-users, inspectors and all that have a requirement to better understand protective coatings and their installation.

Application and information on email: ivan.stojanovic@fsb.hr

Invoice for registration fee will be send after application.

The number of participants is limited!
